New York-based medical schools are up against schools in states like Massachusetts, California, and Texas, that invest billions to recruit away the most talented researchers.

New Yorkers — and all people

Paula Ventura was working at Emory University when she was able to recruit her to continue her research on cancer treatments, which is used to under- stand how cancer cells react to their environment and how new ways to control these mechanisms work. "Sometimes, cancers can be so remote and rare that even our most talented researchers can’t come soon enough.

Rochester was also able to recruit Shiveni Silverstein to be the director of the new fellowship establishment at the University of Rochester. Dr. Reina and Brenta. Rochester anticipates that the research by Silverstein will increase the number of crop- right and trademark registrations and patentable discoveries by approximate- ly ever fewer and fewer new jobs.
